

What is Caça-Watts ("Watt Buster")

Home Energy Audits to Cascais residents

Aims

- To help residents reduce the waste of energy at home;
- To help residents adopt good practice in energy efficiency;
- Reduce by 10% the energy consumption of households in Cascais Municipality;
- Create awareness among residents for the rational use of energy and related environmental issues.

What information do clients receive?

Energy consumption patterns in the household (appliances, water heating and lighting);

- Identification of points of excessive consumption – energy waste hotspots;
- Simulation of the effects of the adoption of certain practices and amendments;
- Thermal photo to locate thermal leaks;
- How and where to reduce the energy waste.

Main Results:

- Average Annual Energy Savings: 15% per house.
- Average annual reduction of greenhouse gases: 275 kg per house.
