Charter

- ▶ Considering that the European Directive on Energy Performance of Buildings represents a great challenge for the transformation of the European building sector towards a better energy efficiency, increased use of renewable energy sources and the reduction of CO₂ emissions,
- ▶ Considering that buildings that receive public should be/become shining examples and conscious of the necessity to rely on our citizens in order to reach our objectives,
- ▶ Considering that it is important to reinforce the entry into force of the European Directive on Energy Performance of Buildings - and to enlarge it to environmental aspects - by a voluntary initiative,

we decide to join the “European Display® Campaign”.
