

DISPLAY® IS YOUR ENERGY INFORMATION! DISPLAY® IS YOUR ENERGY COMMUNICATION!

www.display-campaign.org

To make communication on energy in municipal buildings as easy as possible for you, Energy Cities, Display® pilot cities and experts have prepared this communication handbook. It is intended to help you organise successful awareness-raising activities in your municipality's public buildings in support of the Display® poster campaign.

If you consider yourself a newcomer in organising local energy-saving projects, the entire approach from beginning to end will be of interest for you. More experienced cities will rather find selected parts of the handbook useful.
